ABOUT VAIL MOUNTAIN

HISTORY

THEN

It was Charles Vail, Chief Engineer of the Colorado Highway Department, who cut a highway over the pass and into the valley. But it was a veteran of the 10th Mountain Division and a member of the Civilian Conservation Corps who trained in these mountains in World War II and turned “No Name Mountain” into one of the most romantic brand names in American life. What Pete Seibert and Earl Eaton saw was a 3,000-foot plunge from the mountaintop to a valley as level as a ballroom floor. When the ski resort opened in 1962, Vail had four houses and one telephone; the resort had five lifts and a gondola stretching from the base to the bowls on the backside. The first people to come to Vail Mountain were simply delighted at the privilege of skiing it. Vail embraced those who loved mountain life. It was about the spirit of adventure.

10th MOUNTAIN DIVISION

At Vail, you’ll soon recognize the infectious feeling we call the “spirit of Vail.” It reflects Vail’s founding ethos: a bold sense of adventure, self expression and enterprise that comes from the ski area’s founding by veterans of America’s legendary 10th Mountain Division of the U.S. Army. The 10th Mountain Division was formed in the shadow of what was to become Vail Mountain amidst the trying times and peril of World War II. Composed of innovative, adventurous mountain men, the early progenitors of Alpine skiing and climbing, including immigrants and in some cases refugees from fascist Europe – the men of the 10th Mountain Division all brought with them a common purpose of adventure and love for the mountains. Camp Hale was built half-way between Leadville and what was to become Vail in twenty years time. And in that moment, without yet knowing it, 10th Mountain Division veterans Pete Seibert and Earl

Eaton fell in love with the idea that eventually became Vail. Returning from their heroic exploits in northern Italy and the battle of Riva Ridge, like so many of that greatest generation, Pete and Earl were not satisfied with everyday life back in America. Together, they envisioned America’s greatest ski resort, a perfect confluence of their restless spirits, their bold expression and desire to return to their mountain roots. In 1957, Seibert and Eaton peered into the vast expanses behind No Name Mountain, saw what today has become Vail’s legendary Back Bowls, and knew that they had found their home. Five years later in 1962, Vail Mountain, with its legendary bowls now coming to life for skiers, was born. The rest is history.

NOW

Coveted as one of the largest ski resorts in the world with more than 5,200 acres of skiable terrain, seven legendary Back Bowls spanning seven miles, and the most groomed terrain on the planet, Vail has been an extraordinary winter vacation destination for passionate skiers and snowboarders for more than 50 years. It is home to world-class athletes during the U.S. Ski Team early-season training sessions in Golden Peak, the Burton U.S. Open Snowboarding Championships and the 2015 World Alpine Ski Championships. Under blue skies more than 300 days each year, friends and families reconnect and celebrate here from year to year and generation to generation. The vacation experience is exceptional, from the Vail Ski & Snowboard School to events, activities and festivals, shops and spas, abundant culinary experiences and luxurious accommodations. Coupled with the vision inherent in the spirit of Vail’s founders, and a modern day commitment to excellence in all aspects of guest service and operations, Vail is a mountain resort *Like nothing on earth.*
